

# LearnIT2teach

## Maksym Achkasov

has completed a 2.5-hour professional development workshop introducing computer-assisted language learning and blended learning.

## Stage 1 Introduction

*September 2023*

Trainer: Jen Artan

## Stage 1 Training Outcomes:

Participants experience an overview of the three components of the LearnIT2teach Project (the web portal, the learner courseware, and the instructor training) through interaction with a multimedia demonstration slideshow and an H5P interactive content activity.

Participants are introduced to important e-learning concepts related to the LearnIT2teach Project and the teacher training, such as blended learning, learning management systems (LMS), learning objects, and educational resources and e-activities.

**Participants select a target benchmark level and complete tasks as a newcomer/learner in the LINC courseware to gain a general understanding of:**

- logging on and off
- updating their personal profile
- viewing the course gradebook
- viewing the Announcements Forum and the Checklist
- completing a Quiz activity to explore Courseware Help resources
- posting in a discussion Forum
- making a selection in a Choice activity
- submitting a response for an online text/PoodLL voice (recording) Assignment
- adding an entry to a Glossary
- completing a needs assessment Questionnaire activity
- adding an entry to a learning style preference Database
- viewing printable curriculum and classroom resources
- interactive reading & listening SCORM activities [SCORM = Shareable Content Object Reference Model]
- Wiki tasks

Participants are introduced to research-based good teaching principles and relate these to the LMS & learner courseware.
