LearnIT2teach

Maksym Achkasov

has successfully completed LearnIT2teach

Stage 2

Awarded October 2023

Trainer: **Jen Artan**

A project of NEW LANGUAGE SOLUTIONS

Stage Two Outcomes:

This training prepares settlement language instructors working in a blended learning or fully online context to provide a range of online learning opportunities using LINC courseware. Hosted in Moodle, an open-source learning management system (LMS), this participant has demonstrated (through quizzes and computer editing courses) the skills or knowledge of a Moodle "editing teacher".

The completion of Stage 2 of the LearnIT2teach training includes the ability to:

- assist participants to update their personal profile

- customize the course home page as an editing teacher

- access LINC curriculum and printable materials within the LMS

- facilitate /manage various LINC courseware activities, e.g. discussion forums, assignments, calendar events, glossaries, etc.

- create new base content and perform essential tasks in an online learning environment, e.g. adding a page, linking to a website, adding a needs assessment poll, etc.

- locate and use gradebook data

- access LMS support from several online sources

- identify how using an LMS and LINC courseware can support good teaching principles

Note that although the training is delivered in Moodle, many of its elements and functionality are similar to other Learning Management Systems. Furthermore, the LINC courseware activities are SCORM compliant, i.e. teachers are able to use these activities with other platforms and use other SCORM activities with the courseware made available to them by LearnIT2teach.

Course duration: minimum of 15 hours
