

# LearnIT2teach

**Maksym Achkasov**

has successfully completed LearnIT2teach

**Stage 3**

(did not meet TESL Ontario PTCT requirements)

*January 2024*

Trainer: **Jen Artan**

## Stage Three Outcomes:

Participants in Stage 3 facilitate the LINC courseware while developing more insight into online/blended learning, best practices in settlement language training and Moodle course editing and course management.

### **By the end of Stage 3 participants will be able to:**

- Facilitate program delivery using the LINC courseware while applying best practices in online/blended learning
- Deploy the LINC Courseware using a student-centered approach to online/blended learning
- Manage the LINC courseware using at least one advanced feature of Moodle
- Extend course communication and enhance course content using Moodle blocks
- Enhance blended or online learning with Moodle resource modules
- Develop new content using Moodle activity modules, including an online assessment task
- Search, preview and download an H5P or SCORM activity from Tutela.ca and add it to the courseware
- Identify how the LINC courseware supports best practices in settlement language training

*Note that although the training is delivered in Moodle, many of its elements and functionality are similar to other Learning Management Systems. Furthermore, the LINC courseware activities are SCORM compliant, i.e. teachers are able to use these activities with other platforms and use other SCORM activities with the courseware made available to them by LearnIT2teach.*

**Course duration: minimum of thirty hours**
